VOLUME 19 1987

SUBJECT INDEX

Acetylcholinesterase activity, 287
  acetylcholinesterase molecular forms
  sucrose density gradient centrifugation
Acetylcholinesterase molecular forms, 287
  acetylcholinesterase activity
  sucrose density gradient centrifugation
Acute phase reaction, 69
  fever
  hypothalamus
  rabbits
  thermal stimulation
Adenosine deaminase, 473
  immunohistochemistry
  regional distribution
  species differences
  subcellular distribution
Adrenal weight, 511
  corticosterone secretion
  lesions, median eminence
  prolactin secretion
α_2-Adrenergic receptors
  monoamine metabolism
  selective breeding
  yohimbine
Afferent pathway, 723
  fetal cortical grafts
  functional integration
  somatosensory cortex
Alpha adrenoceptors, 465
  amperozide
  locus coeruleus firing rate
  monoamine uptake
  noradrenergic neurons
  serotonin receptors
Amastatin, 145
  angiotensinergism
  bestatin
  dipsogenicity
  dose-dependent response
Amine accumulation, 57
  N-methyl-4-phenyl-1,2,3,6-tetra-hydropyridine
  monkeys
  motor performance
D-Amino acid oxidase localization, 587
  astrocytes
  Bergman glial cells
  cerebellum
Amperozide, 465
  alpha adrenoceptors
  locus coeruleus firing rate
  monoamine uptake
  noradrenergic neurons
  serotonin receptors
Amphetamine infusion, 623
  dopamine/serotonin release
  microdialysis
Analgesia, 141
  diazepam
  flumazepil
  social conflict
Angiotensinergism, 145
  amastatin
  bestatin
  dipsogenicity
  dose-dependent response
Animal models
  anticonvulsant drugs, 337
  anxiety, 293
  audiogenic seizures, 337
  β-carbolines, 293, 337
  drug interaction, 337
  inner ear, 695
  in vitro, 695
  neomycin, 695
  ornithine decarboxylase inhibition, 695
  reflex epilepsy, 337
Anterior hypothalamus, 109
  blood pressure
  hepatoportal osmotic stimuli
  preoptic hypothalamus
  thermosensitive/insensitive neuron comparisons
Anticonvulsant drugs, 337
  animal models
  audiogenic seizures
  β-carbolines
  drug interaction
  reflex epilepsy
Antidromic driving, 651
  electrophysiological connections
  field responses
  olfactory system
  prefrontal cortex
Anxiety, 293
  animal models, 293
  anxiogenic effects, 309
  anxiolytic effects, 309
  benzodiazepine, 309
  benzodiazepine withdrawal, 393
  β-carbolines, 293, 309
  chlordiazepoxide, 607
  depression, 393
  human studies, 393
  receptor ligands, 309
  tolerance, 607
  withdrawal, 607
Anxiogenic effects
  anxiety, 309
  anxiolytic effects, 309
  benzodiazepines, 309
  β-carbolines, 309
  GABA/benzodiazepine receptor complex, 401
  receptor antagonists, 401
  receptor inhibitors, 401
  receptor ligands, 309
Anxiolytic effects, 309
  anxiety
  anxiogenic effects
  benzodiazepines
  β-carbolines
  receptor ligands
Apparatus
  Leitz acquisition and display system, 39
Arterial pressure, 75
  autonomic nervous system
  dogs, awake
  nucleus ambiguus
Ascorbate, 95
  LHRH release
  noradrenergic systems
  opioid peptides
Astrocytes, 587
  D-amino acid oxidase localization
  Bergman glial cells
  cerebellum
Audiogenic seizures, 337
  animal models
  anticonvulsant drugs
  β-carbolines
  drug interaction
  reflex epilepsy
Autonomic control, 639
  cortical projections
  medial frontal cortex
Autonomic nervous system, 75
  arterial pressure
  dentate gyrus
  hippocampus
  perforant path stimulation
  Δ^9-tetrahydrocannabinol
Awake/anesthetized rat, 63
  CA1
  dentate gyrus
  hippocampus
  Δ^9-tetrahydrocannabinol

Barrel cortex, 495
  glucose metabolism
  lesions, 6-hydroxydopamine
  lesions, locus coeruleus
  locus coeruleus
Benzodiazepine binding sites, 485
  catecholaminergic afferents
  cingulate cortex
  lesions, cingulate cortex
Benzodiazepine receptor binding, 743
  chloride channel binding
  MIF-1
  Tyr-MIF-1
Benzodiazepine receptor ligands, 387
  chronic administration
  DMCM antagonist effect
  FG 7142
  lorazepam
Benzodiazepine receptors
  β-carboline inverse agonists, 371, 379
  β-carbolines, 359
  chronic administration, 371, 379
  cognitive processes, 359
  convulsions, 379
  FG 7142 kindling, 371
  FG 7142 sensitivity, 379
  memory, 359
  passive avoidance, 359
  signal detection, 359
Benzodiazepine withdrawal, 393
  anxiety
  depression
  human studies
Benzodiazepines
  anxiety, 309
  anxiogenic effects, 309
  anxiolytic effects, 309
  β-carbolines, 309, 319

β-carbolines, anxiogenic, 301
β-carbolines, anxiolytic, 301
clinical perspectives, 319
endogenous ligands, 301
GABA receptors, 301
human studies, 319
pharmacological activity, 319
receptor ligands, 309
stress, foot shock, 301
Bergman glial cells, 587
D-amino acid oxidase localization
astrocytes
cerebellum
Bestatin, 145
amastatin
angiotensinergism
dipsogenicity
dose-dependent
Bidirectional changes, 347
β-carbolines
food consumption
Bidirectional effects, 327
β-carbolines
petit mal-like seizures
Binding sites, 611
autoradiographic distribution
brain, human
forebrain
opioid receptors
Blood brain barrier
captopril, 461
lateral ventricular cannula, 461
D-[Ala¹]-Peptide T-amide, 629
peptide transportation, 629
salt appetite, 461
third ventricular cannula, 461
Blood pressure, 109
anterior hypothalamus
hepatoportal osmotic stimuli
preoptic hypothalamus
thermosensitive/insensitive neuron comparisons
Bradycardia, 223
EEG
hypothermia
monkeys, rhesus
Δ⁹-tetrahydrocannabinol
Brain
agranular insular cortex, 9
amygdala, 439, 611
anterior hypothalamus, 81, 109, 473
arcuate-median eminence, 195
basolateral amygdaloid nucleus, 651
brainstem, 639, 743
CA1, 63
caudate, 611
caudate putamen, 439
cerebellum, 379, 407, 473, 587, 699, 743
cerebral cortex, 153, 379, 567, 699
cingulate cortex, 485
claustrum, 611
corpus striatum, 619
cortex, 407, 473, 743
dentate gyrus, 63, 245, 635
diagonal band of band of Broca, 195
diencephalon, 407, 735
dorsal midbrain central gray, 195
dorso-lateral septum, 507
forebrain, 39, 287, 611
frontal cortex, 39, 81, 611
fourth ventricle, 679
globus pallidus, 611
hippocampus, 63, 165, 473, 663
hypothalamus, 57, 69, 95, 129, 195, 223, 239, 453, 519, 535, 735, 747
inferior colliculus, 191
infralimbic cortex, 639
insular cortex, 439
internal capsule, 57
lateral agranular cortex, 203
lateral dorsal tegmental nucleus, 639
lateral habenula, 473, 581
lateral hypothalamus, 439, 679
lateral septum, 149, 519, 751
lateral ventricle, 679
limbic forebrain, 35, 519
locus coeruleus, 81, 465, 495
medial agranular cortex, 203
medial frontal cortex, 639
median eminence, 87, 511, 535
mediodorsal cortex, 439
mediodorsal thalamic nucleus, 651
medulla, 191, 407
midbrain, 35, 57
middle forebrain bundle, 485
nucleus accumbens, 39, 545, 623
nucleus ambiguus, 75
nucleus basalis of Meynert, 611
nucleus tractus solitarius, 231, 639
occipital lobe, 223
paraventricular nucleus, 129, 453, 519, 687
parietal lobe, 223
pars intermedia, 261
pars nervosa, 261
periaqueductal grey, 545
periventricular region, 195
piriform cortex, 651
pontomesencephalic tegmentum, 705
prefrontal cortex, 9, 439, 651
prelimbic cortex, 639
preoptic area, 519
preoptic hypothalamus, 109
putamen, 611
putamen globus pallidus, 439
somatosensory cortex, 723
striatum, 19, 35, 57, 269, 407, 421, 623
subcortical region, 223
substantia nigra, 439
superior colliculus, 191
suprachiasmatic nuclei, 135, 429, 687
supraoptic nucleus, 559, 687
suprasylvian gyrus, 567
thalamus, 439, 735
third ventricle, 679
ventral tegmentum, 39
ventromedial hypothalamus, 195
Brain asymmetry, 421
dopamine concentration
neurochemical mechanisms
rotational behavior
Brain, human, 611
autoradiographic distribution
binding sites
forebrain
opioid receptors
Brain, mouse, 673
convulsions, chemically-induced
convulsions, electrically-induced
[³H]nitrendipine binding
Brain potentials, 617
electrophysiological recording
FET-circuits
lesions, inadvertent
Brain regional calcium, 407
cold stress
Brainstem, 191
glucose utilization
monkeys
(¹²⁵I) α-Bungarotoxin, 429
receptor internalization
suprachiasmatic nucleus

CA1, 63
awake/anesthetized rat comparisons
dentate gyrus
hippocampus
perforant path stimulation
Δ⁹-tetrahydrocannabinol
Calcium dependence, 453
depolarizing potentials
hypothalamus
in vitro
neurons, hypothalamic
paraventricular nucleus
Captopril, 461
blood brain barrier
lateral ventricular cannula
salt appetite
third ventricular cannula
β-Carboline agonists, 379
benzodiazepine receptors
chronic administration
convulsions
FG 7142 sensitivity
β-Carboline inverse agonists, 371
benzodiazepine receptor
chronic administration
FG 7142 kindling
β-Carbolines
animal models, 293, 337
anticonvulsant drugs, 337
anxiety, 293, 309
anxiogenic effects, 309
anxiolytic effects, 309
audiogenic seizures, 337
benzodiazepine receptors, 359
benzodiazepines, 309, 319
bidirectional effects, 327, 347
clinical perspectives, 319
cognitive processes, 359
drug interaction, 337
food consumption, 347
human studies, 319
memory, 359
passive avoidance, 359
petit mal-like seizures, 327
pharmacological activity, 319
receptor ligands, 309
reflex epilepsy, 337
signal detection, 359
β-Carbolines, anxiogenic, 301
benzodiazepines
β-carbolines, anxiolytic
endogenous ligands
GABA receptors
stress, foot shock
β-Carbolines, anxiolytic, 301
benzodiazepines
β-carbolines, anxiogenic
endogenous ligands
GABA receptors
stress, foot shock
Catecholaminergic afferents, 485
benzodiazepine binding sites

cingulate cortex
lesions, cingulate cortex

lesions, radiofrequency
prefrontal cortex
Thalamus, 439
electrical stimulation
^{3}H-2-deoxyglucose uptake
insular cortex
mediodorsal cortex
nucleus tractus solitarius
Thermal stimulation, 69
acute phase reaction
fever
hypothalamus
rabbits
Thermosensitive/insensitive neuron comparisons, 109
anterior hypothalamus
blood pressure
hepatoportal osmotic stimuli
preoptic hypothalamus
Thionin technique, 161
Harris' staining
myelin staining
Third ventricular cannula, 461
blood brain barrier
captopril
lateral ventricular cannula
salt appetite
Tissue culture, 153
cerebral cortex
cerebral cortex cells
microglia identification
Tolerance, 607
anxiety
chlordiazepoxide
withdrawal
Topographic relations, 705
cats
cholinergic neurons
noradrenergic neurons
pontomesencephalic tegmentum
Tyrosine hydroxylase, 619
corpus striatum
dopaminergic terminals
phosphorylation
Tyrosine hydroxylase immunoreactivity, 39
cocaine
immunohistochemistry
Tyr-MIF-1, 743
benzodiazepine receptor binding
chloride channel binding
MIF-1

Urine, 129

circadian rhythm
6-hydroxymelatonin
hypothalamus
melatonin rhythm generating system
paraventricular nucleus stimulation
suprachiasmatic nuclei
Virgin/nursing rat comparison, 559
dendrotomy
dye coupling
Lucifer Yellow
supraoptic nucleus neurons

Vasopressin secretion, 135
circadian patterns
in vitro
neuronal activity

Western blot method, 715
gel overlay
high molecular weight proteins
immunological detection

Withdrawal, 607
anxiety
chlordiazepoxide
tolerance

Yohimbine
α_2-adrenergic receptors, 101
central nervous system, 525
monoamine metabolism, 101, 525
selective breeding, 101
spontaneously hypertensive rat, 525
